Passwords and usernames:

- The password for your account will be web!23
- The username for your account will be your first name followed by ctyi (for example, mine would be edenctyi)
- **Issues with usernames:**

  Usernames were assigned at the start of class in week 1, however if your username isn't being recognised you may have set it as a variation of the assigned username, if this occurs attempt one of the following (my first name will be used as an example, you should substitute this with your own first name):
  - **edenctyi**
  - **edencty**
  - **ctyieden**
  - **ctyeden**
  - **CTYIeden**
  - **CTYeden**
 - **edenCTYI**
  - **edenCTY**

Examples of code from class:

Falling ball game:

Hide and Seek:

Pong:

Assigned tasks: finish the pong game and create your own game based on the code we learned in class.

Suggested software: if anyone is interested in pursuing videogame design a little further beyond scratch I would recommend the app "gamemaker studio" which works on both pc and mac

Good luck with your games everyone! 😊
