

## **Lesson Seven – Activity Sheet**

### Who Wants To be a Millionaire?

Have a go at this quiz I've made including questions from all seven classes. Copy and Paste the Link and it should bring you straight to the quiz. If you have any issues, contact me:

### Activity:

Okay guys, so for this activity, I am going to give you a list of topics, ranging from easy to hard. What I'd like you to do is pick one topic and find some information on it. Now you can handwrite this, draw it, type it – whatever you are most comfortable doing. These topics are going to make you think a little bit and use the information you already have to find the information you need to answer there.

They are not here to trick you or catch you out – and I only want you to do them if you have time. Once you have completed it, send me a picture or attach it to an email.

- 1. What's the difference between a mountain and a volcano?**
- 2. What's the difference between a wave and a tsunami?**
- 3. What's the difference between a cyclone, hurricane and typhoon?**
- 4. Draw and Label an earthquake proof building (you can be as imaginative as you want)**
- 5. Draw a comic strip style picture illustrating how our moon was formed**
- 6. Create your own planet and tell me about it – what's its name? how was it formed? What type of planet is it? What are the living conditions like?**
- 7. Draw the three types of plate boundaries**
- 8. How do cities protect against tsunamis?**

9. Why are there no tornados on Antarctica?

10. What is the difference between a drought and a flood?

### **How to make a tornado at home?**

This link will bring you to a video, where they use three different methods to make a tornado at home. Did you come up with any of these?
